Profile

Passionate Flutter developer with over 2 years of experience and a solid Computer Science background, specializing in developing iOS and Android apps using Dart and Flutter framework. Working in collaboration on projects has helped realize potential and enhance skills in building scalable mobile applications. Eager to take on new challenges and play a key role in creative, dynamic projects, contributing to the success of the team.

Professional Experience

Flutter Developer And Project Manager

Mar 2025 - present | Peshawar, Pakistan

Metasence Technology Pvt, Ltd Company

- Designing scalable mobile applications using GetX
- Assisting in the design and testing of intelligent user interfaces
- Writing clean, modular code following best development practices
- Researching and experimenting with new AI tools for new functionalities

Flutter Developer

june 2025 - Feb 2026 | Peshawar, Pakistan

IplexSoft Pvt, Ltd Company

- Designing scalable mobile applications with optimal performance.
- Debugging and resolving errors in existing projects, ensuring smooth functionality.
- Ensuring code quality through rigorous testing, code reviews, and best practices.
- Optimizing app performance by enhancing user experience.
- Gaining hands-on experience with state management solutions like Provider

Flutter Developer

jan 2025 - june 2025 | Peshawar, Pakistan

Veevo Tech Technology Pvt, Ltd Company

- Worked on implementing core functionalities and features for various projects.
- Collaborating with team members to develop and enhance project features.
- Gained exposure to integrating backend services, including Firebase, for mobile apps
- Debugging and fixing issues in projects under senior developer guidance.
- Enhanced problem-solving skills through hands-on experience with real-world mobile app issues.

Freelance Flutter Developer

June 2024 - Aug 2024 | Peshawar, Pakistan

Fiver/Upwork/Freelancer

- Developed a strong UI/UX with stable Databases for topnotch Mobile Applications
- Enhanced problem-solving skills through hands-on experience with real-world mobile app issues.
- Worked for international clients in various projects

Skills

Git & GitHub

Proficient in version control using Git, managing repositories on GitHub, collaborating via branches, pull requests, and resolving merge conflicts efficiently.

Flutter Developer

Firebase

Storage, Databases, Realtime Database, Authentications

API Integrations

Integrate Business-level API Node Js and Flutter

Google Service Integrations

Maps, GeoCodings, InAppPurchase,

Architecture and Design Patterns

MVVM

Databases

SharePreferences, Get Storage, Hive

In-depth Knowledge

Dart, OOP

State Management

Provider, GetX

Projects

Empleado app (Live project)

Worked on the live Empleado HR and Attendance App – a workforce management platform used for employee attendance tracking, leave management, overtime requests, payroll support, employee records, and schedule management. Contributed to mobile app development, API integration, bug fixing, performance improvements, and feature implementation to ensure a smooth user experience across mobile and web platforms.

Play Store: <https://play.google.com/store/apps/details?id=com.empleadoapp> | App Store:

<https://apps.apple.com/pk/app/empleado/id1463761446>

QueryQ App (Live App)

QueryQ is a customer communication app that helps businesses manage messages in one place. It allows companies to handle customer conversations more easily, reply faster, and improve customer support without switching between different apps. Currently, WhatsApp integration is available, and more communication channels are being added gradually.

Play Store: https://play.google.com/store/apps/details?id=com.veevotech.query_q | App Store:

<https://apps.apple.com/us/app/query-q/id6587561505>

MedTag ID

Collaborating as part of a development team at Metasense Technology. Worked on MedTag ID, a medical emergency identification app that allows users to securely manage medical information and share emergency health details through QR-based access for faster emergency response and improved patient safety.

App Store: <https://apps.apple.com/pk/app/medtagid/id6753061029>

ICUP – GPS Location Based Attendance System

Developed an advanced location-based attendance system in Flutter that employs a multifactor verification mechanism. The system ensures students can mark their attendance only when physically present within the designated classroom location, verified using GPS and device location services. A fingerprint authentication feature has been integrated to enhance security and prevent proxy attendance.

Logistics (Driver and User App)

Worked as part of a team of Flutter developers at iPlexSoft to develop two logistics applications: a Logistic User App and a Logistic Driver App. Advanced AI models were integrated to enhance the user experience, enabling fare-based driver matching, voice-command location setting, customer searches for drivers, journey creation, and more. The project utilized Provider for state management and custom APIs for efficient data handling.

Driver App: <https://play.google.com/store/apps/details?id=app.logistics.driver> | User App:

<https://play.google.com/store/apps/details?id=app.logistics.user>

Trenzyme (CMMS)

Contributed to the development of Trenzyme, a Computerized Maintenance Management System designed to streamline maintenance operations. The app comprises three modules—Manager, Agent, and User—each with distinct authorization levels. Features include ticket creation/assignment, status updates, comment sections, and a built-in chat module for seamless communication.

App Store: <https://play.google.com/store/apps/details?id=com.mms.Trenzym>

Kabir's Restaurant App

Contributed to the development of Kabir's Restaurant, a live food ordering and restaurant management application that allows customers to browse menus, place online orders, customize meals, and enjoy a seamless food ordering experience through mobile and web platforms.

App Store: <https://apps.apple.com/gb/app/kabirs-restaurant/id1492677> | Play Store: <https://play.google.com/store/apps/details?id=co.uk.kr.kabirsrestaurant>

Point of Sale (POS)

Designed and implemented a comprehensive Retail POS application tailored for supermarkets and stores to streamline and manage daily operations. Features include Point of Sale, Arrivals Management, Quotations, Inventory Management, Client Management, and Billing Procedures. This project was integral in helping store owners automate and simplify their accounting and stock management processes.

Tailor App

Developed a Tailor App, a digital tailoring management platform that helps tailor shops manage customer measurements, orders, delivery tracking, and payment records while streamlining day-to-day tailoring operations.

Ali Medical Center – Hospital Management App

Developed a Hospital Management App for Ali Medical Center, a healthcare management platform designed to streamline hospital operations, including patient registration, appointment scheduling, doctor management, medical records, billing, and patient care management.

Coin Cap Convert

Collaborated on the development of Coin Cap Convert, a cryptocurrency conversion app focused on live coin price tracking, real-time currency conversion, and market trend monitoring for multiple digital assets.

Attendance App – Face Recognition System

Developed a Face Recognition Attendance App using Google ML Kit and TensorFlow to automate attendance management through facial recognition technology. The system enables secure and accurate employee/student attendance tracking by detecting and recognizing faces in real time.

Liquid Canvas

Contributed to the development of Liquid Canvas, a multimedia application that allows users to upload and share personal photos and videos directly to the TVs of family members and friends. The app transforms connected TVs into dynamic digital picture frames, enabling a seamless and interactive way to share memories in real time.
